Regional Approaches in Addressing I&I – Part 2

This year, our round table will consist of west Florida utilities and experts to discuss their unique approaches to identify, abate and prevent I&I within their collection systems. This round table is a follow-up to the original I&I roundtable FWEA hosted a couple of years ago to discuss the approaches that many west Florida utilities were taking to tackle I&I issues within their collection systems. The presenters will discuss topics, such as:

What were the project drivers?

Recap what the I&I Identification/Abatement Program approach

What was found during investigations?

How much were the investigation or abatement costs?

What were the project successes?

Reduced flows at plant?

No wet weather related SSOs?

Grant/Funding opportunities?

Long term cost savings?

How are you addressing private laterals?

What's next?

Permanent Flow Monitoring?

Additional project areas?

Lessons Learned?

Our guest panelists will include Hillsborough County, Pinellas County, City of Largo, and industry leading specialists. Join us for this this great group of presenters and stay tuned for more additional event details!

City of Largo - Robert Stoltenberg

Hillsborough County – John McCarry or delegate

Pinellas County – Dan Glaser
